Hello Doug. Understood. Rob Law will be at the CAG meeting on the 21st and also Tony from my company (who I think Debbie knows). They can both talk about 10.9 as needed. Probably a few others from the CPG as well.

On another matter I wanted to see if we could get a spot on your agenda for April - for the return visit we talked about last year. This would be a continuation of the Sustainable Remedy discussion. I think I originally talked to Debbie about maybe coming in March, but I want to be absolutely sure we have all the modeling info you want as well as thorough answers to questions that came up during our last presentation. In my discussions with the CPG I am not sure we would be completely ready in March, but we will be in April.

Please just let me know when convenient. Thanks and see you soon.

Ray

Subject: February CAG Meeting

Hi Ray, in the end we are keeping the 2/21 meeting date as further changes became too complicated.

We understand that the CPG will be in Lyndhurst. We will be discussing 10.9 at some level as the Lyndhurst CAG meeting ended up not being very productive from a CAG dialogue standpoint. We will have Stephanie and Ray there from EPA to provide a brief overview and answer any questions.

If the CPG will also have someone there who would like to be available to talk about 10.9 just let me know.

thanks

Doug
